ABOUT

Second-year Computer Science student (BUT – DACS track). Motivated and versatile, I want to apply my technical skills in a company and easily adapt to tools, teams, and projects.

SKILLS

- network administration (router/switch configuration)
- web development (TypeScript, SQL, C, Python, PHP)
- virtualization (VMware, VirtualBox)
- team management and communication

- languages: French (native), English (B2 level)

PROFESSIONAL EXPERIENCE

Order Picker – Amazon Augny, FR

June 2025 to September 2025

- order preparation
- stock handling in accordance with productivity objectives

Front Desk and Administrative Assistant – Garage Lorraine Diesel (Woippy)

June 2024 to August 2024

- customer reception
- scheduling and phone management
- digital administration (quotes, invoices)

EDUCATION

Bachelor of Technology in Computer Science (Networking track), Second Year

IUT METZ
2024 – Present

> Learning how to deploy, configure and secure network and system infrastructures, as well as developing web applications and scripts (PHP, TypeScript, SQL), with a focus on logic and code quality.

High School Diploma in Industrial Science and Sustainable Development – Honors

Lycée Louis de Cormontaigne, Metz
2022 – 2024

PROJECTS

- **Mobile Application for Real-Time Parking Guidance**

  > Development of a client/server application that guides users to an available parking space in real time, using open data and a secure network architecture.

- **Web Application Development**

  > Design and development of an interactive TypeScript website with user interface, software architecture, OOP, UI design, and functional testing.

- **Client Requirement Implementation**

  > Pair-programmed a command-line game in C, focusing on software logic, simple architecture, and testing to meet functional specifications.
